

VINITH KUMAR GUDIBANDA PRASANNAKUMAR

Dublin, Ireland | vinithvkk050@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineer- Python with 3+ years of hands-on experience building production-grade backend systems, RESTful APIs, microservices, and automated ETL pipelines. Proficient in Python, Flask, Django, SQL, AWS, and CI/CD workflows. Experienced in writing clean, testable, well-documented code across Agile environments. MSc in Data Analytics (NCI Dublin). Passionate about building scalable, high-performance backend solutions and collaborating with cross-functional teams to ship reliable software.

TECHNICAL SKILLS

Languages: Python (Advanced), SQL, JavaScript, HTML, CSS

Frameworks & Libraries: Flask, Django, REST APIs, Microservices, PySpark, Asyncio, Pytest

Databases: MySQL, MongoDB, PostgreSQL, Database Design & Query Optimisation

Cloud & DevOps: AWS (EC2, S3, Lambda), Git, GitHub, CI/CD Pipelines, Docker, Agile/Scrum, JIRA | **AI/ML:** Scikit-learn, TensorFlow, AI/ML Frameworks, Jupyter Notebook and Visual Studio

PROFESSIONAL EXPERIENCE

Software Engineer - Python · Infidata Technologies | India

Jan 2021 – Dec 2022

- Designed, developed, and deployed scalable Python-based RESTful APIs and microservices using Flask on AWS, improving system scalability by 30% and ensuring high availability in production environments.
- Built and maintained automated ETL pipelines in Python processing millions of records daily; implemented CI/CD workflows via Git and AWS that reduced deployment time by 40% and eliminated manual release errors.
- Developed high-performance asynchronous components using Python asyncio and async libraries, increasing system throughput by 20% and reducing API latency during peak traffic loads.
- Optimised MySQL databases with advanced indexing, query tuning, and schema design, improving data retrieval speed by 35% for critical backend services.
- Wrote comprehensive unit and integration tests (Pytest), conducted code reviews, and mentored junior developers, consistently raising code quality and adherence to Python best practices.
- Collaborated with cross-functional teams (product, QA, data science) in Agile sprints to deliver secure, well-documented Python solutions on schedule and within scope.

Associate Software Engineer – Python · Infidata Technologies | India

Jul 2019 – Dec 2020

- Developed Python scripts for automated data validation and backend data processing workflows, improving data accuracy and reducing manual intervention across multiple reporting pipelines.
- Built and optimised SQL queries for large-scale data extraction and transformation, supporting backend services and enabling data-driven decision-making across business teams.
- Contributed to version-controlled codebase using GitLab, applying clean code principles, writing reusable modules, and maintaining comprehensive documentation for shared Python libraries.

KEY PYTHON PROJECTS

Automated Loan Processing Platform | Python · Flask · PySpark · MySQL · AWS · REST APIs · CI/CD · ML

- Built an end-to-end Python backend platform for automated loan processing, featuring RESTful microservices on AWS, asynchronous job queues, and real-time ML-driven credit scoring and cutting processing time by 40%.
- Engineered robust ETL pipelines and CI/CD workflows with Git and AWS, integrated Power BI dashboards via API for live financial reporting, ensuring clean separation of concerns and high test coverage.

Digital Banking API Platform | Python · Flask · Django · MySQL · AWS · REST APIs · Asyncio · CI/CD

- Developed a suite of Python-based banking APIs using Flask and Django with asynchronous request handling, real-time transaction processing, and AI-driven anomaly detection & reducing system security incidents by 25%.
- Automated full CI/CD deployment pipeline on AWS for zero-downtime releases; wrote extensive unit and integration tests achieving high code coverage across all API endpoints.

EDUCATION

MSc in Data Analytics · National College of Ireland, Dublin

Jan 2024

Relevant: Machine Learning & AI · Cloud Computing · Applied Predictive Analytics · Database Design · Data Mining & Statistical Analysis

ADDITIONAL HIGHLIGHTS

- Led and mentored 100+ interns in Python development and ML at Infidata Technologies, boosting project completion rates by 45% through structured code reviews, workshops, and pair programming sessions.
- Delivered Python development workshops across 10+ colleges, teaching backend development fundamentals, REST API design, and best practices to 500+ students and demonstrating strong communication and technical teaching skills.
